ACADEMIC PROJECTS

- ❖ **ESARA – An e-commerce website**
  Site features include the ability to examine products via the API, filter by price, color, and other parameters, add items to the cart for future consumption, and save items to favorites. - Reactjs, React redux , Styled-Components.
  https://meanish.github.io/esara/

- ❖ **BookMe– Api's based Hotel Recommendation and Reservation**
  It connects travelers with a wide selection of places to stay, including 5-star luxury resorts, apartments, vacation homes, family-run B&Bs, tree houses and igloos. Site also provides information on available flights, rental cars, and restaurants according to the client's booking request. The data were collected from the RapidApi site.
  https://meanish.github.io/BookMe/

- ❖ **Pizza World**
  This web application facilitates viewing the pizza menu of the restaurant with amazing pictures with it. A simple site prepared using Html, Css , JQuery and more.
  https://meanish.github.io/Pizza/

- ❖ **CloudPoint – Api's based Weather Forecasting page**
  A real time weather information of different cities on google maps with additional functionalities - Javascript,SASS,React.js.
  https://meanish.github.io/WeatherForecast/

PROFESSIONAL TRAINING

- ❖ **Workshop | 3D modeling & Rendering** (Apr 2 - Apr 15,2022)
  Recently I participated in a modeling program organized by the college. In this workshop we were taught about 3D modeling using software like MAYA. It was a short period program so we barely completed two projects:
  - .a) Modeling a beverage can and rendering it 📄 Coke.jpg   b) 3D house modeling 📄 Home.png
